

BUILDING EXECUTIVE FUNCTIONING SKILLS WITHIN YOUR CHILD

Virtual Event Presented by

Mandi Croft-Petoskey, Ed.D., NCSP, ABSNP & Amanda Moons, Ed.S., NCSP

Neuropsychologists of Neuro Educational Specialists

Monday November 9, 2020 at 7pm

RSVP: <https://buildingefskills2020.eventbrite.com>

D103 PTO welcomes back Dr. Mandi Croft-Petosky and Ms. Amanda Moons of Neuro Educational Specialists to delve further into executive functioning skills and how we as parents can help our children develop these much-needed skills. Executive Functioning encompasses so many necessary skills that help children succeed in school and beyond. Dr. Croft-Petosky and Ms. Moons will walk us through 4 key areas of executive functioning and what practical steps parents can take at home to support the development of these skills and facilitate change. The four key areas our speakers will cover are:

1. Sustained Attention and Working Memory
2. Planning, Prioritizing, and Organization
3. Time Management
4. Stress Tolerance and Emotional Control

For More information on our speakers, you can find their bios at: <https://www.neuroeds.com/our-team>
